

ENFORCER

5000

U.S. ARMOR'S ENFORCER 5000 is the next evolution resulting from the increased ballistic and physical demands of the NIJ 0101.06 standards.

The Enforcer 5000 is an advanced technological design combining Honeywell's proven Gold Flex and new advanced Spectra Shield ballistic materials along with DuPont's™ Kevlar® XP™, the latest woven fabric from the Kevlar® family of performance aramids. The end result is a lighter, more flexible and more comfortable vest that still satisfies the performance requirements of the NIJ 0101.06 Standard.

The Enforcer 5000 Female model has actual formed bust cups achieved through darting, providing a much more natural and comfortable feel and fit for female officers.

NIJ .06 BVP GRANT APPROVED
