

ENFORCER XP

The ballistic and physical demands of the NIJ 0101.06 standards resulted in advanced technological developments, the Enforcer™ XP™ is the product of these improvements. In conjunction with the new NIJ .06 standard, U.S. Armor is committed to staying true to our mission of creating the thinnest, lightest and most comfortable vest; while maintaining the integrity of delivering the superior ballistic protection you have come to expect from our company over the last quarter-century.

Kevlar® XP™ is DuPont's™ newest woven fabric from their Kevlar® family of performance aramids; Kevlar® XP™ has been completely redesigned for today's modern threats. One of the key improvements is the ability of the material to reduce backface deformation by approximately 15% or more when compared to other ballistic materials. Additionally, the design matrix of this product has allowed us to make our vests even thinner than similar competitors' ballistic packages. To further enhance your comfort we have incorporated a new, multi-directional neoprene strap system for improved wearability.

The Enforcer™ XP™ from U.S. Armor is designed to help you go home safely at the end of your watch; just try it on, we know you'll wear it.

U S A R M O R
you'll wear it.

New "COMFORT ACS" Advanced Cover System

- Removable, washable panel cover in male and female sizings
- Anti-microbial Closed-Hole Mesh fabric with built-in 2-way stretch
- "Comfort Curve" padded shoulder strap system for enhanced weight distribution
- "Easy Access" closure system for simplified panel removal, mounted away from the body for increased comfort
- Akwadyne® moisture-wicking mesh on body side and tuck-in tails

Closure system

- 6-point multi-directional, breathable neoprene and Velcro® (removable) and 4-point "Wide-Wrap" both included

Ballistic material

- DuPont™ KEVLAR® XP

Ballistic capabilities

	II	IIIA
(V-50 performance)		
9mm (124gr. FMJ)	1604 fps 488.19 mps	
.357 Mag (158 gr. JSP)	1630 fps 496.82 mps	
.357 SIG (125 gr. FMJ)		1768 fps 538.89 mps
.44 Mag (240gr. SJHP)		1646 fps 501.70 mps
